Subject: Water Damage Notice and Procedure for Siemens LV NEMA Motors

Date: 8/31/2017

In case of water damage and threat thereof, the owner of the Siemens motor or the equipment that has a Siemens motor as a component should remove said motor from the application or OEM equipment.

The motor should be taken to an authorized EASA Electric Motor service shop for evaluation. The service shop can determine whether the motor can be repaired or a replacement is needed.

In any case of water damage, the warranty is void on the motor.

Thank You and Best Regards,

Latisha Hill
